Connect and Cook with Confidence

Sync One Wireless Thermometer

All the benefits of a traditional wireless thermometer plus a unique standalone Smart Base that can be used to set desired temperatures and monitor your cooks.

The Smart Base Does it All

Our innovative Smart Base charges the probes, acts as a WiFi bridge and allows you to control and monitor your cooks without being tethered to your phone.

Stay Connected

Our innovative, patented antenna design combined with Bluetooth 5.3 technology provides double the signal strength of most wireless thermometers. Never ruin your cooking again.

Dare to Compare

Packed with cutting-edge features that outshine the competition. Using patented technology that provides the most stable connections, the Sync offers the precision and stability that others can't match.

We Don't Just Claim Accuracy, We Back it Up

With an ultra-thin probe and six optimally positioned sensors for higher accuracy. Every Sync is verified accurate by NIST to $\pm 0.5^{\circ}\text{F}$ ($\pm 0.3^{\circ}\text{C}$). A calibration certificate is included the Sync, guaranteeing accuracy for a lifetime.

Wireless Thermometers Just Got Smarter

Heat resistant up to 400°C

Probes are waterproof to IPX8

Unlimited distance when using the app

50 hour battery life

Predictive algorithm knows when your food will be done

Durable Zirconia, T-shaped handles
